82 mm ROUND WITH HE-FRAG MORTAR BOMB

NSN : 1315-50-001-5861

The 82mm mortar round with high-explosive fragmentation bomb made of sphero-graphite cast iron for 82mm mortar is intended for use against enemy manpower located in the open, in unarmored vehicles and machine-gun nests. The enhancement of the fragmentation effect is a result of the powerful explosive material and the high mechanical properties of the body.
