

**VD-1
FUZE**

NSN: 1390-50-0012421

The VD-1 fuze is intended for use on GTB-7VS, GTB-7VM thermobaric grenades for the RPG-7V grenade launcher and serves to ensure their safety during handling and firing and to detonate the warhead upon impact with a target. The fuze is base, impact with inertial action, boresafe type.

CHARACTERISTICS

Type	Mechanical
Weight, kg	0,080
Arming distance, m	$\geq 2,5 \dots 15$
Distant arming time, s	0,020...0,114
Safe drop height, m	3
Safe operational temperature range, °C	-40...50
