

122 mm M-21OF ROCKET

NSN: 1315-50-0012411

The 122 mm rocket is designed for destroying mortars, field and rocket artillery and motorized units, defeating manpower and enemy firepower in entrenchments and trenches, destroying communication lines, strongpoints and field defense constructions, making passages in defense wirings and outlook posts, destroying enemy's back areas (railway junctions, headquarters, concentrated military forces) and large-area simultaneous destruction of group targets through volley fire.

CHARACTERISTICS

Weight of rocket, kg	66,180
Maximum range, m	20127
Maximum velocity, m/s	690
Spoiler rings	Small and big one
Damage area per rocket, m ² :	
- one round against manpower, m ²	708
- one round against unarmoured vehicles, m ²	610
- one round against light armoured vehicles, m ²	513
Safe operational temperature range, °C	-40...50

SYSTEM

BM-21 "GRAD" Multiple-Launch Rocket System

PACKING

Dimensions, mm	2807x280x252
1 rocket in a case	
Gross weight, kg	100
